IDENTIFIERS	National School Lunch Program; School Breakfast Program; Special Milk Program

ABSTRACT

The status of school food services in 152 cities with populations of 100,000 and over for fiscal year 1974 is reported here. It consists of six sections: general information on all schools, schools in the national school lunch program, schools with other and no food service, schools in low income areas, schools in the school breakfast program, and schools in the special milk program. Numbers of schools and of children are shown by elementary and secondary grades and by a combination of both. The total number of children with access to a lunch program increased slightly from 1973 to 1974. Lunch programs are available to 86.5 percent of all the school children. The National School Lunch Program is offered by 87.5 percent of the schools in low income areas as compared with 64.8 percent of the schools in other areas. In addition to being more likely to have this program in their schools, the children in low income areas participate in the lunch program at a higher rate than the other children. Higher participation rate in low income areas is accounted for by the fact that most of the lunches are served free or at a reduced price. (Author/AM)

URBAN SCHOOL FEEDING SURVEY

INTRODUCTION

The Annual Urban School Feeding Survey is a collection of data pertaining to school food service operations in cities with populations of 100,000 persons and over. The data in this survey come from reports submitted by 152 United States cities and are based on school food service activity during the month of March 1974.

There were 19,643 schools included in this year's survey, an increase of 158 schools from the March 1973 tabulation. Chart I shows the relative proportion of various food service programs as a function of total average daily attendance for both 1973 and 1974. The total number of children with access to a lunch program did increase slightly from 1973 to 1974.

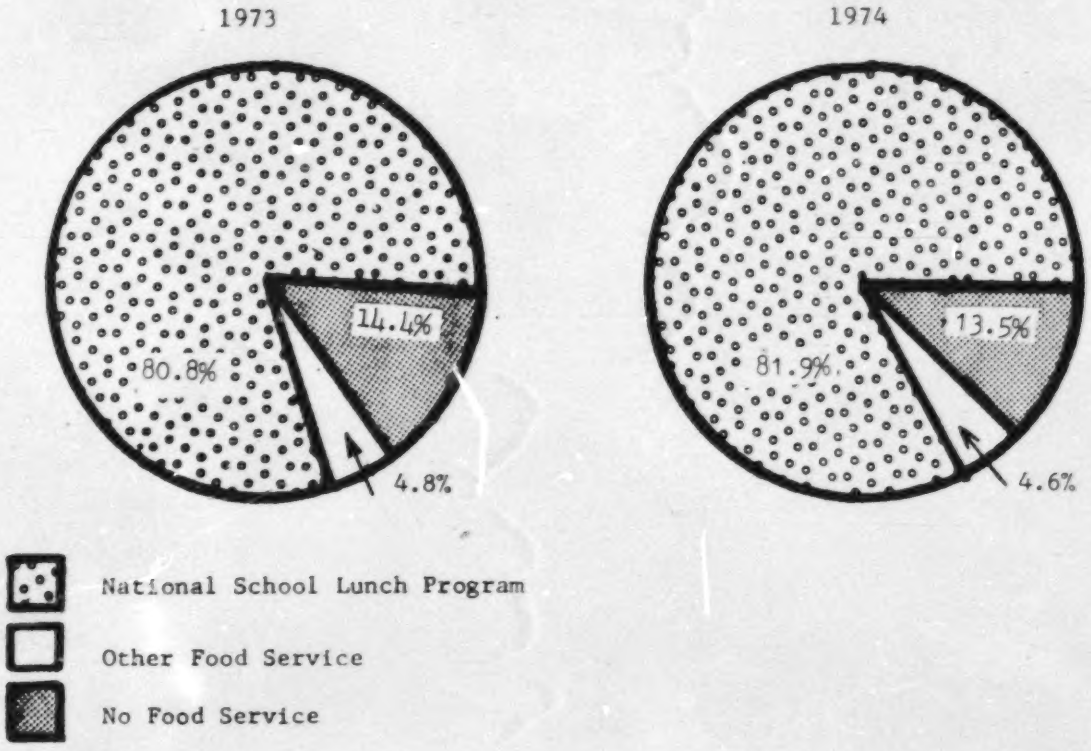

Chart I - Total average daily attendance by type of Food Service for 1973 and 1974.

Availability and Utilization of Programs

The Urban School Feeding Survey for 1974 shows that lunch programs were available to 86.5% of the school children in cities with populations of 100,000 persons or over. The National School Lunch Program (NSLP) was offered to 81.9% of the school children in these cities. Over 78.4% of the elementary school children had access to the NSLP as compared to 87.1% of the children in secondary schools. National School Lunch Program availability varied by region as shown in Chart II.

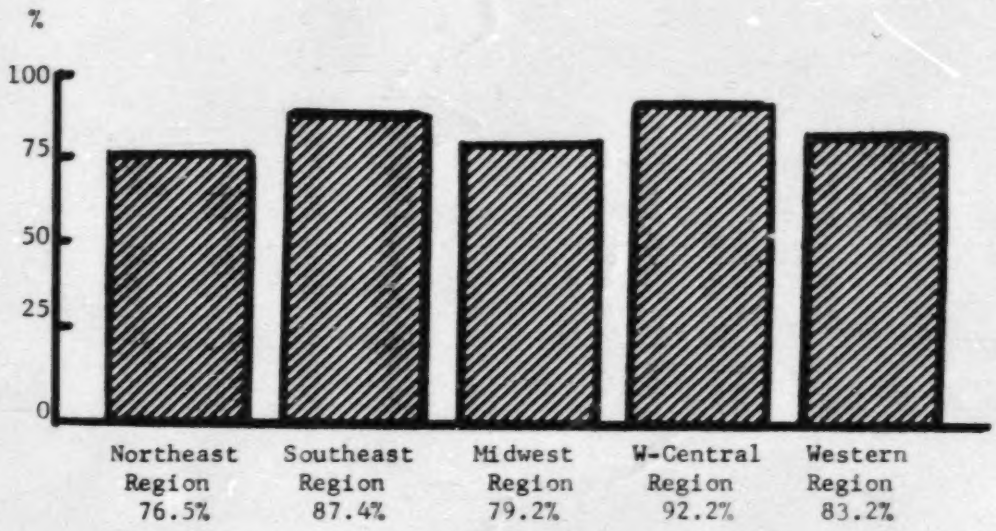

Chart II - Average Daily Attendance in NSLP Schools as a Percentage of Average Daily Attendance in Total Schools.

More than one-third of the children in this year's survey attended schools located in low-income areas of their cities. The National School Lunch Program was offered by 87.5% of the schools in low income areas as compared to 64.8% of the schools in other areas. The NSLP was available to 91.7% of the children in low income area schools, while 76.9% of the children in other areas had access to the NSLP. In addition to being more likely to have the NSLP in their schools, the children in low income areas participated in the lunch program at a higher rate than other children. The survey indicates that 61.4% of the children in low income area schools received lunches in the NSLP as opposed to 49.7% of the children in other NSLP schools. Chart III depicts this difference with respect to elementary and secondary NSLP schools.

One reason for the higher NSLP participation rate in low income area schools than other schools may be that most of the lunches were served to the students free or at a reduced price. Low income area NSLP schools served 76.8% of their lunches free or at a reduced price, while other schools served 52.4% free or reduced price lunches.

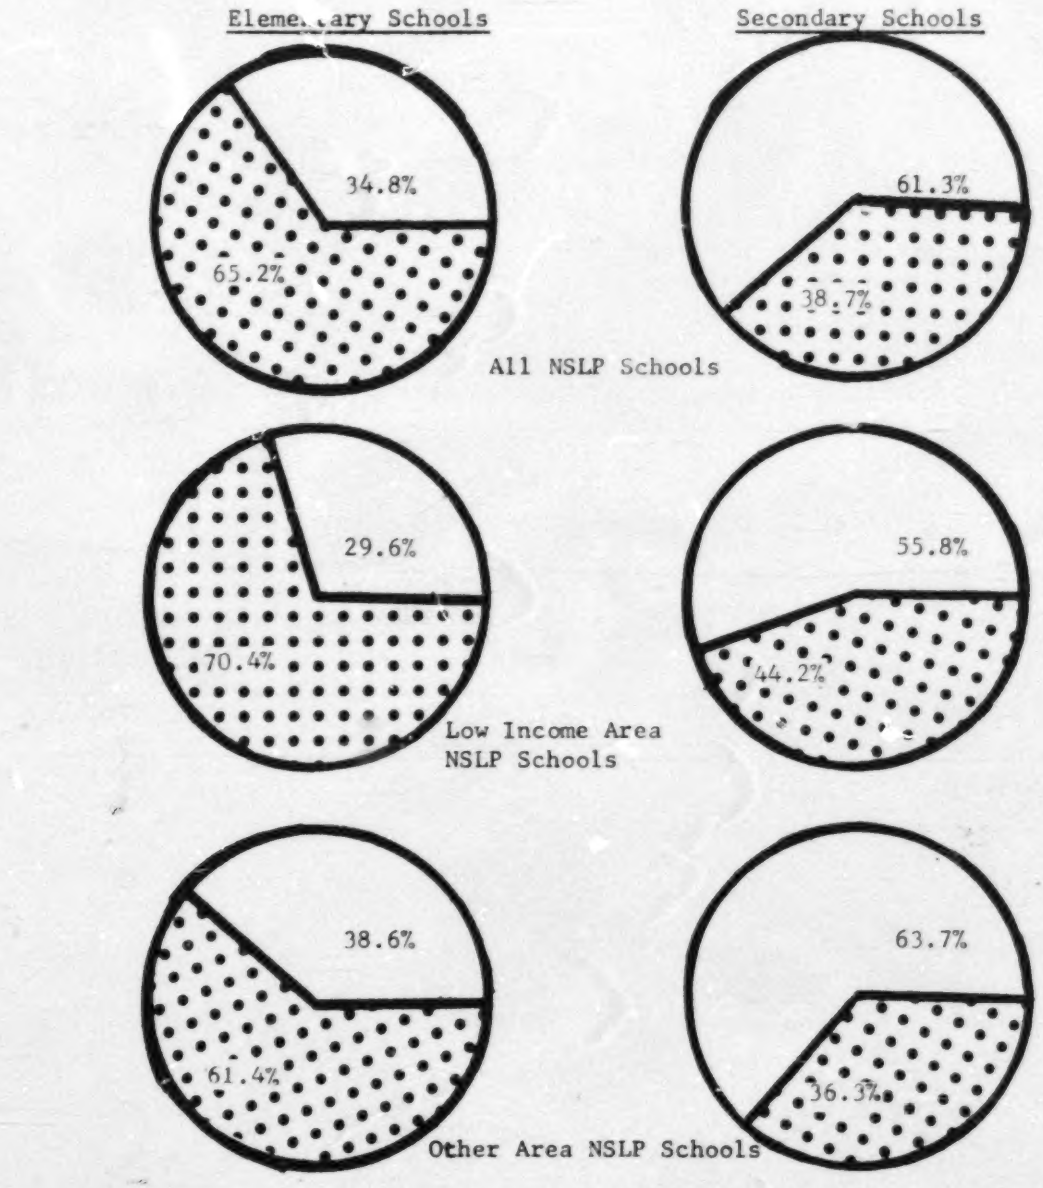

Chart III -- Average Daily Lunches as a Percentage of Average Daily Attendance in NSLP Schools.

The rate of children participating in the National School Lunch Program was 54.1% for all NSLP Schools. The rate varied by region among NSLP schools as shown in Chart IV.

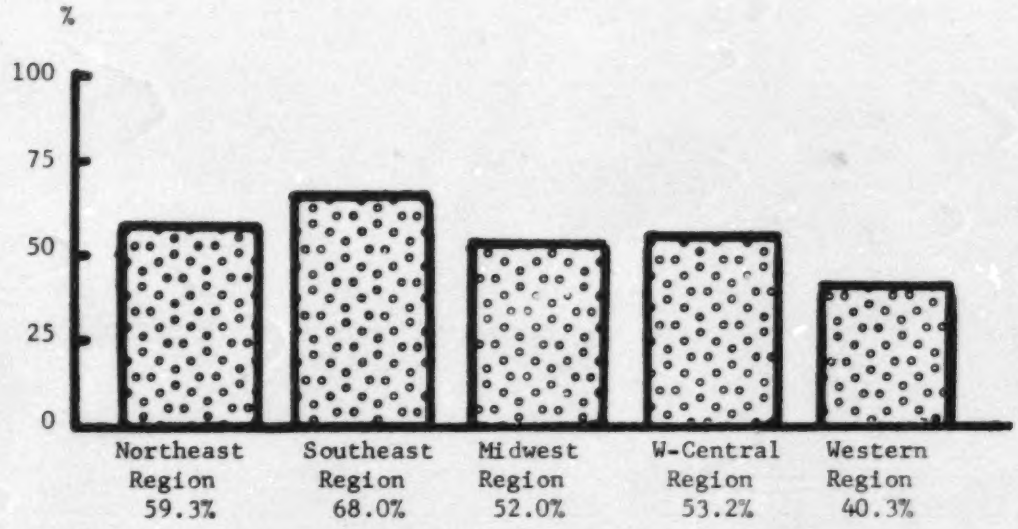

Chart IV -- Average Daily Lunches as a percentage of Average Daily Attendance in NSLP Schools.

The School Breakfast Program (SBP) was offered in schools attended by 18.9% of the children covered by the survey. The SBP was available to 21.9% of the elementary school children and 14.2% of the secondary school children. Over 26.4% of the children with access to the SBP were participating on a regular basis. The elementary children participate at about 31.6% as shown in Chart V.

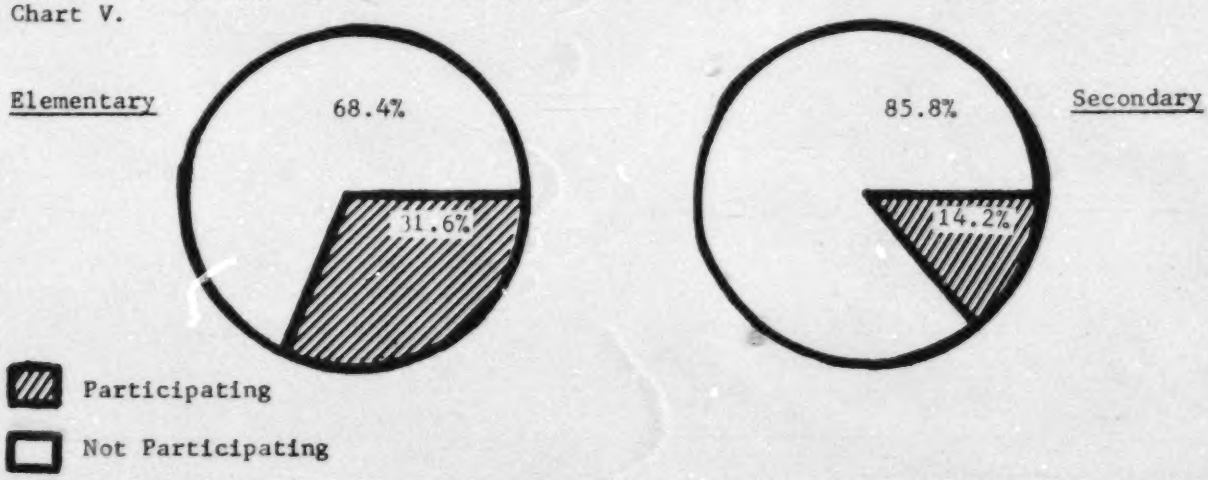

Chart V -- Average Daily Breakfasts as a percentage of Average Daily Attendance in School Breakfast Program Schools.

The Special Milk Program was made available to over 74.8% of the children attending surveyed schools. The program was about equally accessible to children attending both elementary (74.6%) and secondary (75.1%) schools.

Some 1,247 schools surveyed offered their students a lunch service other than the National School Lunch Program. These schools were attended by 4.6% of the total children surveyed. In these schools 51.7% of the children participated in the lunch service as compared to a participation rate of 54.1% in NSLP schools. Chart VI shows the breakdown between elementary and secondary schools for children with access to a lunch program.

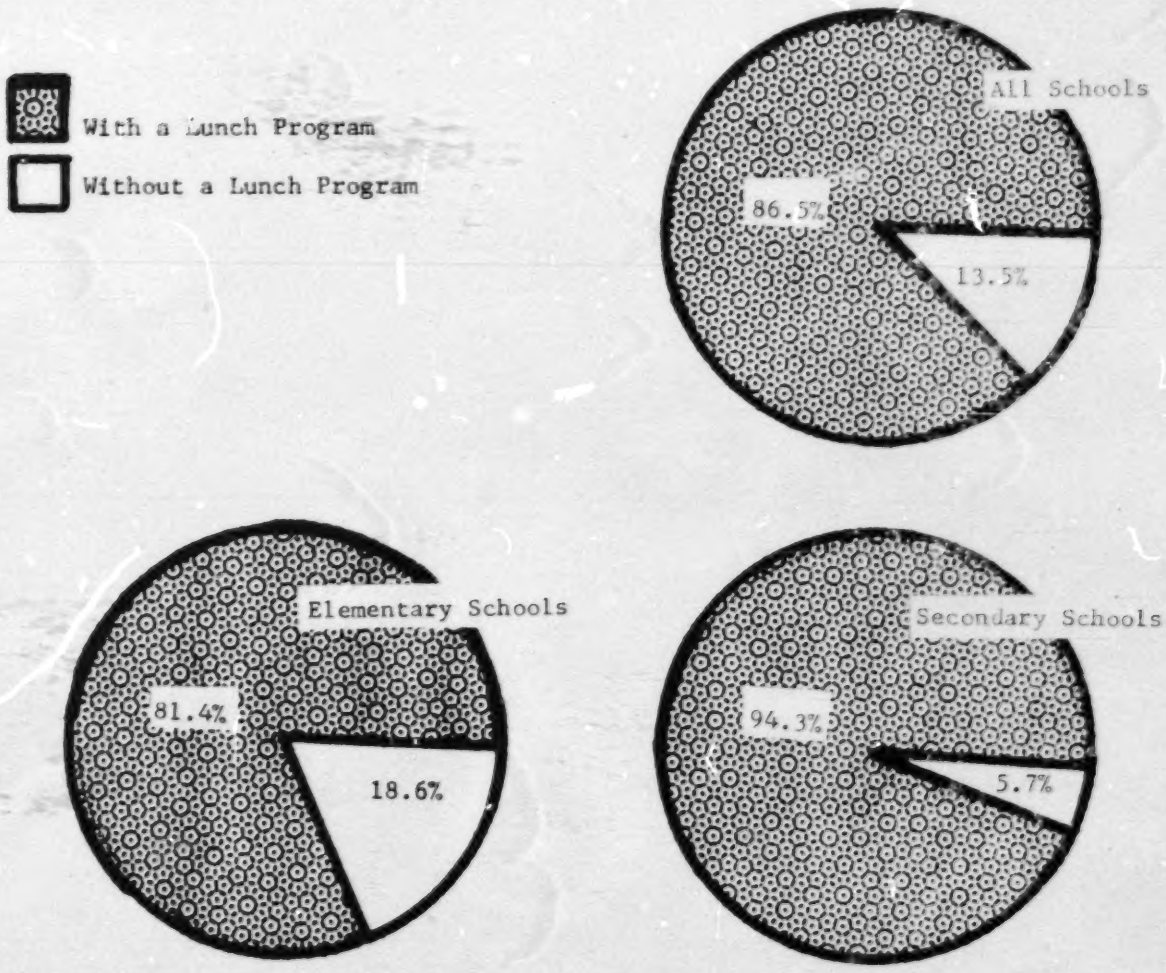

Chart VI -- Children Attending Schools with and without a Lunch Program.

As Chart VI illustrates, some 94.3% of the secondary school students had access to a lunch program of some kind in their schools. In elementary schools however, only 81.4% of the students had a lunch program available to them. This may be due to the half-day sessions in many elementary schools.

Most of the children attending schools which did not offer a lunch program were located in the Northeast and Midwest areas of the country as shown in Chart VII.

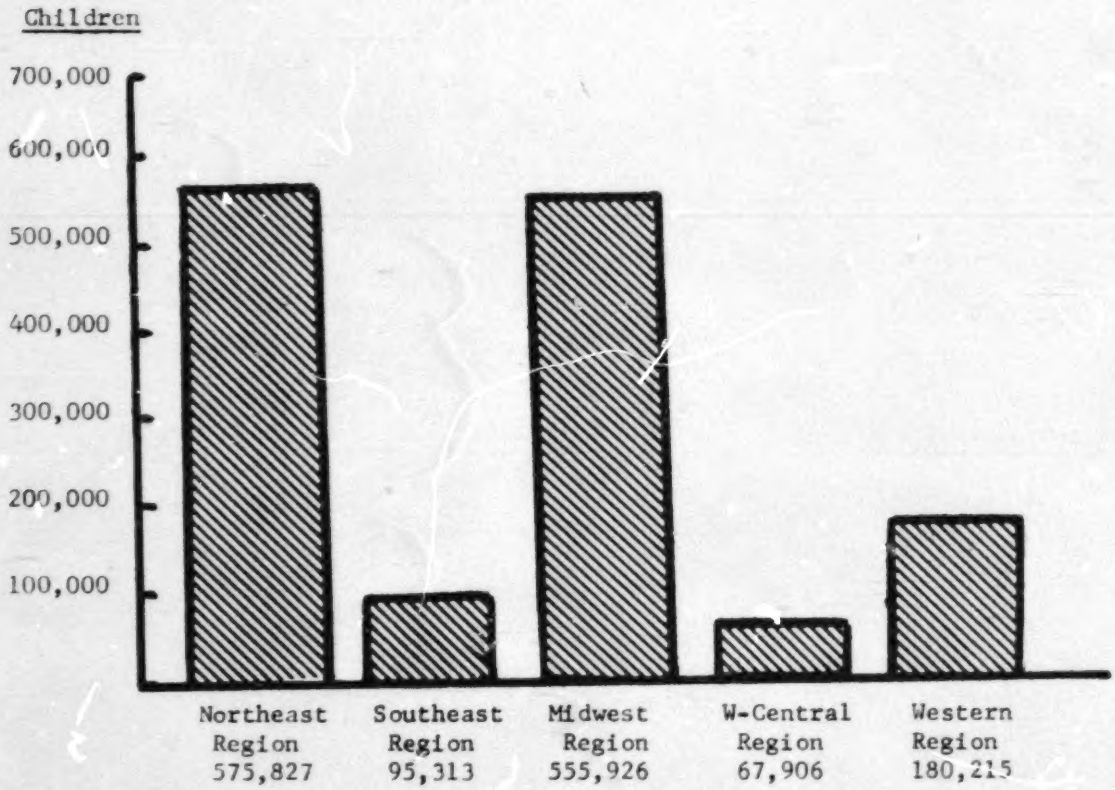

Chart VII -- Children Attending Schools Without a Lunch Program.
